UNCOMPROMISING PERFORMANCE...

SPECIFICATIONS

ENGINE POWERED LIFT TRUCKS 4.0 - 5.5 TONNES

UNCOMPROMISING PERFORMANCE...

THESE LARGER ENGINE-POWERED MODELS ARE DESIGNED FOR HEAVY DUTY APPLICATIONS AND ARE THE NATURAL CHOICE FOR USE IN PORTS, CONSTRUCTION SITES, FREIGHT FACILITIES, AND METAL AND BRICK OPERATIONS.

In the diesel-powered models, the tough, electronically controlled common rail Stage V engine allows each cylinder to work at peak efficiency regardless of load and speed. It also contributes to the truck's exceptionally low noise, vibrations, emissions and fuel consumption.

The GP40-GP55N3 models are equipped with a GCT GK45 LPG engine with standard catalytic converter that delivers good performance, excellent fuel economy and low emissions, as well as low noise and vibration levels.

The compact, smooth lines of each model enable easy manoeuvring in confined spaces whilst ensuring good visibility.

The capabilities of the range are further boosted by a wide array of options that enable you to fine-tune each truck to your work requirements.

LOWER COST OF OWNERSHIP

- Specially positioned air intake system lengthens the life of air intake filter cartridges.
- LCD multifunctional display with indicators providing soot status (diesel) and all safety functions allows for rapid troubleshooting.
- Long service interval reduces maintenance costs and downtime.
- Durable transmission system gives smooth, accurate gear changes and low noise levels.
- Highly regarded, market-proven industrial diesel Stage V and LPG engines give excellent performance.
- LED front and rear combination lights reduce energy consumption and maintenance needs.

UNMATCHED PRODUCTIVITY

- Engine hour meter keeps track of hours worked, helping fleet managers to schedule regular maintenance.
- Compact truck design increases manoeuvrability in areas with restricted space.
- Cooling system designed to reduce blockages utilising pusher type radiator airflow.
- Wide variety of mast types and lifting heights allows the truck to be specified to your needs.
- Full floating powertrain, with two forward speeds and one reverse speed, delivers high gradeability and fast travel.
- Hydrostatic steering system makes manoeuvring the truck light and easy.
- Optional factory-fitted panel cabin keeps the elements out, without compromising visibility, combining form and function in a design which keeps the truck performing in the most extreme of temperatures and in wet environments.

SAFETY AND ERGONOMICS

- PDS+ Presence Detection System disengages drive and hydraulic functions when the operator's seat is vacated.
- Ground speed control feature limits truck's top speed.
- Electronic button-operated parking brake is convenient and safe.
- Ergonomically shaped Grammer seat with back cushion is designed for optimal lateral support and driver comfort.
- Hydraulically controlled drum brake system gives increased safety.
- Adjustable steering column enables comfortable operation.

Mast Performance and Capacity

- h1 Height with mast lowered
- h2 Standard free lift
- h3 Lift height
- h4 Height with mast raised
- h5 Full free lift
- Q Lifting capacity, rated load
- c Load centre (distance)

* Truck equipped with dual tyres. Consult your dealer for maximum back-tilt allowed, to obtain the capacities specified.

Capacity vs. Load Distance

Simplex - h3 = 4000mm
