

ENTRY-LEVEL FORKLIFTS WITH CAT® LIFT TRUCKS QUALITY

EQ Line

CAT® EQ LINE COUNTERBALANCE AND WAREHOUSE PRODUCTS

Choices expanded — application matching simplified

Does your application really need a high-spec lift truck? If not, don't overspecify. A truck with simpler specifications will be a better fit in such cases. That's why we've developed the Cat EQ Line. It offers you fit-for-purpose alternatives – with quality assured.

Here's your choice...

EQ Line

Cat EQ Line. Entry-level products for everyday jobs that simply require a dependable lift truck. Less intensive applications with occasional or light to medium use. EQ Line trucks have everything you need to do the job, in a simple, straightforward package.

HS Line

Cat HS Line. Our long-established and world-renowned ranges of high-spec products. For critical tasks demanding 100% in terms of performance, productivity and efficiency. Jobs where anything less can seriously affect your business.

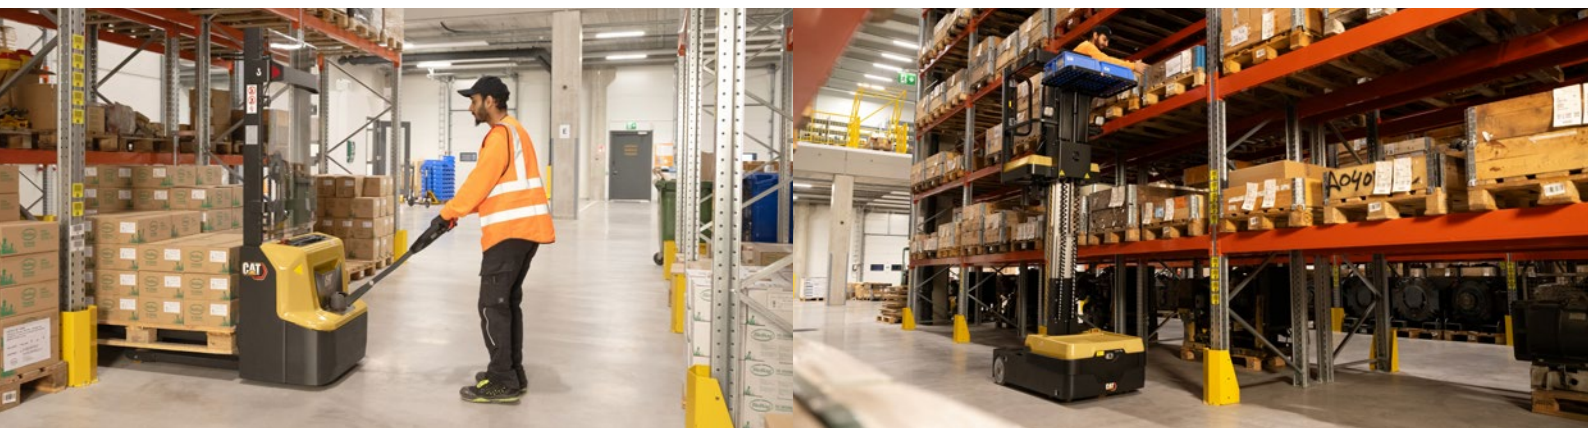

Choose quality and strong support

Importantly, EQ Line products share the characteristic qualities of all Cat lift trucks, including:

- Sturdy construction
- Easy maintenance
- Energy efficiency
- Robust performance
- User-friendly design
- Safety

What's more, they're marked with the Cat Lift Trucks brand. This symbol of quality, dependability and performance gives you added confidence. And, of course, they're backed by great service and support from our dealer network.

These factors set Cat EQ Line products apart from the 'economy' brands you may be considering.

LI-ION TECHNOLOGY AS STANDARD

All EQ Line trucks benefit from the productivity, efficiency and long-term cost-saving advantages of lithium-ion (Li-ion) battery technology. These include:

Longer runtimes

More consistent power levels

No need for battery maintenance

Longer battery lifespan

Use of opportunity charging for continuous operation without battery changes

The batteries we've chosen feature an advanced battery management system (BMS) which optimises power, lifetime and safety.

EQ Line electric counterbalance forklifts are equally at home in warehouse aisles or weather-beaten yards. This flexibility reduces your fleet needs and investment. They also offer a wide model range. Choose from three or four wheels, 48 or 80V power, and load capacities from 1.6 to 3.5 tonnes. Whatever best fits your application – without overspecifying.

DOWNLOAD
SPEC SHEET

EP16-35Q(T)(L)

ELECTRIC COUNTERBALANCE FORKLIFTS

1.6 - 3.5 tonnes

Materials handling made simple

Everything you need – and nothing you don't

Applications include:

- Lifts up to 6 metres
- Loads up to 3.5 tonnes
- Loading and unloading vehicles
- Transport over large and small sites
- Indoor and outdoor work
- Use on rough surfaces and gradients

You can depend on these versatile EQ Line electric counterbalance forklifts to get the job done. Without fuss, frills or unnecessary features. Designed for light or medium duty applications, both outdoor and indoor, they're reliable, robust and economical to operate. The trucks are user-friendly without being unnecessarily luxurious. Familiar and intuitively functioning controls combine with comfortable seating and low vibration levels to create good conditions for productivity.

Specification choices include a variety of simplex and triplex masts. Simplex versions offer a cost-effective, single-stage lifting approach for basic applications. Triplex masts enable greater lift heights, along with versatility for both low-clearance and high-rack operations. A hook-on side shift, fitted as standard, simplifies and speeds up pallet handling and placement.

Front and rear super elastic tyres are specified as standard. They give a long service life, while protecting other components against vibration-related wear thanks to their excellent shock absorption. Their smooth ride qualities enable reliable performance on uneven floors and provide extra comfort for the driver.

Model choice:

MODEL	CAPACITY (tonnes)	LOAD CENTRE (mm)	VOLTS/ Ah
EP16QT	1.6	500	76.8/125 (206 option)
EP20QT	2.0	500	76.8/125 (206 option)
EP16Q	1.6	500	51.2/206 (277 option)
EP20Q	2.0	500	51.2/206 (277 option)
EP25Q	2.5	500	76.8/206 (277 option)
EP30Q	3.0	500	76.8/206 (277 option)
EP35Q	3.5	500	76.8/206 (412 option)
EP35QL	3.5	600	76.8/206 (412 option)

Standard features also include:

- Effective sealing – protecting key components against water-related damage.
- Familiar and intuitive controls, including conventional hydraulic levers – allowing easy operation from day one with less need for training.
- Seat suspension – reducing vibration and ensuring driver comfort.
- Safety features, like full road light kit, rear blue spot, strobe light, reverse warning buzzer and parabolic rear-view mirror – minimising accident risks and safeguarding drivers.

Optional features:

- Fork positioner including side shift
- Non-marking super elastic tyres
- Increased travel and lift speed
- Integrated or external chargers
- Fingertip hydraulic levers
- Luxury seat
- Glass roof (or PVC on 3-wheel models)
- Front window with wiper
- Complete weatherproof cabin
- Cold store modification (down to - 18°C)

Our EQ Line power pallet ranges start with mini power pallet trucks. Amazingly compact but impressively strong and resilient, they can work just about anywhere. Our more conventionally shaped pedestrian power pallets come with capacities of 1.6 or 2.0 tonnes. Choose whichever will most economically meet your application needs. We also have a 2.0 tonne platform power pallet truck. Its folding platform can be deployed for comfort and speed over longer distances but quickly folded away to reduce dimensions in confined areas.

All EQ Line power pallets feature compact and stable designs, with a small turning radius. These allow quick, safe performance and manoeuvrability in narrow aisles and other tight spaces.

Fast plug-in diagnostics, troubleshooting and programming – via an external port – reduce truck downtime and maintain efficient performance.

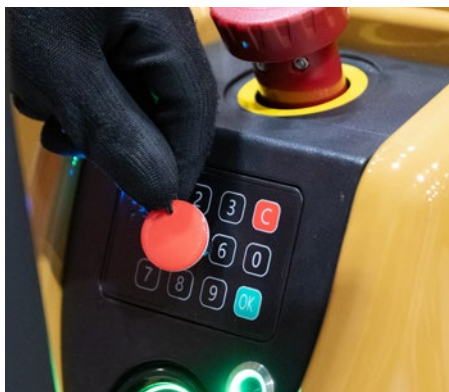

PIN code access prevents unauthorised use. In the 1.6 and 2.0 tonne pedestrian power pallets and platform power pallet, this is combined with a convenient keyless start and is supported by RFID tags.

Multifunctional tiller control

Controls for lifting and lowering, forward and backward travel, and emergency reverse, are conveniently housed and easily reached within a multifunctional tiller head. The tiller head design enables strain-free, single-handed use of the controls and operation of the truck. A turtle/creep speed button allows manoeuvring with the tiller arm vertical, for safe movement through narrow spaces.

In all models the tiller arm is spring-loaded. Its ergonomic design gives a comfortable grip and precise control with minimal effort and fatigue. The arm itself is optimally long in the pedestrian models and short in the platform trucks.

NPP15/20Q2BL

MINI POWER PALLET TRUCKS

24/48V, 1.5 - 2.0 tonnes

Mini but mighty

The go-anywhere load movers

Applications include:

- Moving goods over short and medium distances
- Loads up to 2.0 tonnes
- Loading, unloading and shuttling
- Use in very small spaces, such as vehicles, cargo containers, narrow aisles and the smallest buildings

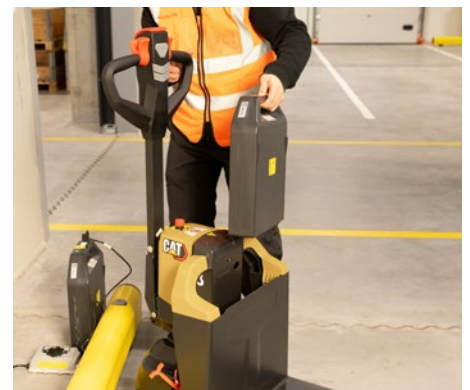

These handy little pallet trucks are great all-rounders, combining small size and low weight with impressive power. Our EQ Line mini power pallets will fit anywhere – and work anywhere. Inside vehicles and cargo containers. On floors with weight limits. Through narrow aisles and passages. In cluttered workshops, retail stores, small supermarkets and local warehouses. Wherever you need them.

Model choice:

MODEL	CAPACITY (tonnes)	LOAD CENTRE (mm)	MAX SPEED (km/h)	VOLTS/ Ah
NPP15Q2BL	1.5	600	4.9	24/20 (40 option)
NPP20Q2BL	2.0	600	4.9	48/20

Features include:

- LED display with fault warnings – enabling timely attention to prevent damage.
- Thick forks (4.0 to 4.5 mm) – giving extra strength and longer service life.
- Side castor wheels (optional) – further enhancing stability.
- 800 mm marking on forks – helping with easy and steady crosswise handling of EU pallets.
- External fast 24V 12A charger option – allowing full recharging of a spare battery in just 2 to 3 hours.
- Quick battery exchange – requiring no additional tools or devices.

NPP16Q2L

PEDESTRIAN POWER PALLET TRUCK

24V, 1.6 tonnes

A cost-saving workmate
Carry more – pay less

Applications include:

- Horizontal transport of loads
- Short and medium distances
- Loads up to 1.6 tonnes
- Loading, unloading and shuttling
- Use in tight spaces such as lorries, elevators, congested loading docks and narrow aisles

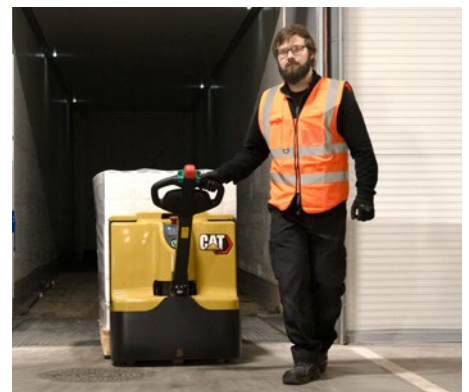

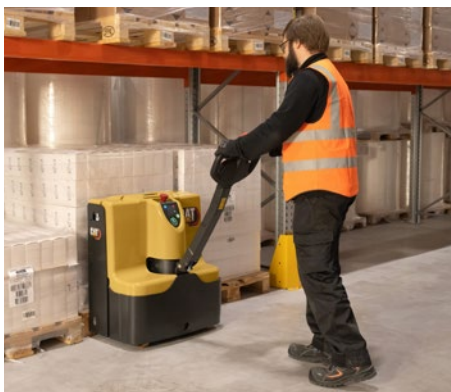

Another handy little warehouse assistant. Our EQ Line 1.6 tonne pedestrian power pallet takes much of the effort and expense out of moving goods. It's robustly built, easy to manoeuvre, strong and reliable. You can expect productive, trouble-free performance and low running costs over a long lifetime.

One model:

MODEL	CAPACITY (tonnes)	LOAD CENTRE (mm)	MAX SPEED (km/h)	VOLTS/ Ah
NPP16Q2L	1.6	600	6.0	24/100

Features include:

- High-quality, robust construction – including a steel chassis frame – ensuring reliable operation and a long life, with minimal servicing and repair needs.
- Optional automatic cornering speed reduction – avoiding loss of stability.
- Load backrest option – helping to keep pallet and goods stable.
- Pallet entry rollers – enabling fast pick-up of closed-bottom pallets.

SPEC SHEET

NPP20Q2L

PEDESTRIAN POWER PALLET TRUCK

24V, 2.0 tonnes

A strong friend for life

Heavy loads carried at low cost

Applications include:

- Horizontal transport of loads
- Short and medium distances
- Loads up to 2.0 tonnes
- Loading, unloading and shuttling

Our EQ Line 2.0 tonne pedestrian power pallet is designed for light and medium warehouse duties. Like the 1.6 tonne model, it promises durable quality, easy manoeuvring and high strength. Inexpensive to buy and run, it will give you many years of dependable, productive service.

One model:

MODEL	CAPACITY (tonnes)	LOAD CENTRE (mm)	MAX SPEED (km/h)	VOLTS/ Ah
NPP20Q2L	2.0	600	6.0	24/100 (150 option)

Most key features are the same as on the 1.6 tonne model, but please note:

- 1.6 tonne model comes with a 24V100Ah battery and 24/40A charger
- 2.0 tonne model can be specified with an optional 24V/150Ah battery and 24/60A charger

Each battery and charger combination gives powerful performance and long runtime between charges.

SPEC SHEET

NPV20Q2L

PLATFORM POWER PALLET TRUCK

24V, 2.0 tonnes

Versatile, comfortable and efficient
Walk or ride – whichever best suits the task

Applications include:

- Horizontal transport of loads
- Short, medium and longer distances
- Loads up to 2.0 tonnes
- Loading, unloading and shuttling

With our EQ Line platform power pallet truck, we keep materials handling simple but add extra versatility, comfort and efficiency. Its folding ride-on platform is the key to faster performance – and less operator fatigue – over longer distances. With the platform folded away, this truck can turn in narrower aisles than comparable power pallets. An ideal choice for light and medium warehouse duties.

One model:

MODEL	CAPACITY (tonnes)	LOAD CENTRE (mm)	MAX SPEED (km/h)	VOLTS/ Ah
NPV20Q2L	2.0	600	8.0	24/150

Features include:

- High-quality, robust construction – including a short and strong steel chassis – ensuring reliable operation over a long lifetime, with minimal servicing and repair needs.
- Durable, adjustable pull-rod lifting system – offering extra structural strength, with high resistance to bending and deforming, for reliable performance, maximum stability and long life.
- LCD display with fault warnings and hour meter – enabling timely attention to prevent damage.
- BDI (battery discharge indicator) – supporting optimal timing of battery charging and changing.
- Built-in USB port – allowing onboard charging of devices such as phones and barcode readers.
- Folding platform – deploying quickly to save effort and increase speed over longer distances, or folding up to reduce dimensions when working in smaller spaces.
- Protective side bars – folding easily into place to help avoid falls and defend against impacts.
- Electric power steering – providing precise and almost effortless manoeuvrability.

The EQ Line offers a choice of compact pedestrian stackers. These versatile trucks are a great do-it-all solution, especially in smaller workplaces. The smallest and simplest truck uses a mono mast. We also have duplex mast models with a wider selection of application-matched masts.

All EQ line stackers benefit from high-quality, robust construction, which includes an impact-resistant steel chassis cover. Their resilience helps ensure reliable operation and a long life, with minimal servicing and repair needs.

Fast plug-in diagnostics, troubleshooting and programming – via an external port – further reduce downtime and maintain efficient performance. A clear display presents status information and fault warnings, enabling timely attention to prevent damage. PIN code access and keyless start, supported by RFID tags, prevents unauthorised use and saves time.

An inbuilt charger allows simple plugging in to any suitable electrical socket, wherever you are. The truck's battery level display supports optimal timing of battery charging and changing.

Automatic cornering speed reduction avoids loss of stability.

Multifunctional tiller control

As on the EQ Line power pallet trucks, controls for lifting and lowering, forward and backward travel, and emergency reverse, are conveniently housed and easily reached within a multifunctional tiller head. The tiller head design enables strain-free, single-handed use of the controls and operation of the truck.

A turtle/creep speed button allows manoeuvring with the tiller arm vertical, for safe movement through narrow spaces. The tiller arm is spring-loaded. Its ergonomic design gives a comfortable grip and precise control with minimal effort and fatigue.

NSP12Q2LM

COMPACT PEDESTRIAN STACKER WITH MONO MAST

24V, 1.2 tonnes

Versatility in a small package
Do it all with one little lift truck

Applications include:

- Stacking up to 2.0 metres
- Loads up to 1.2 tonnes
- Short shuttle runs
- Use of compact size for work in small spaces and for transport via elevators or vans
- Filling store shelves
- Order picking

For light duties in warehouses, supermarkets and production areas, our EQ Line compact pedestrian stacker with mono mast is ideal. This economical, versatile and space-saving truck allows you to handle a wide variety of tasks using just one machine. What's more, its small size means you can easily transport it between different work areas and sites.

Features include:

- Compact and stable design, with efficient steering and a small turning radius – allowing fast, safe performance and manoeuvrability in narrow aisles and other tight spaces.
- Light weight – making the truck ideal for use on mezzanines.
- Clear-view mono masts – giving excellent forward vision (available with maximum lifts up to 2.0 metres).
- Initial lift (optional) – raising mast and forks to give increased ground clearance, for better performance on ramps, dock levellers and uneven floors.

One model:

MODEL	CAPACITY (tonnes)	LOAD CENTRE (mm)	MAX SPEED (km/h)	VOLTS/ Ah
NSP12Q2LM	1.2	600	4.5	24/60

SPEC SHEET

NSP12/13Q2LD(I)

COMPACT PEDESTRIAN STACKERS

24V, 1.2 – 1.3 tonnes

A neat space-saving solution

Give your business a lift – with one small truck

Applications include:

- Stacking up to 3.6 metres
- Loads up to 1.3 tonnes
- Short shuttle runs
- Use of compact size for work in small spaces and for transport via elevators or vans
- Filling store shelves
- Order picking

A wide choice of mast specifications brings even greater versatility to our EQ Line compact pedestrian stackers with duplex masts. Their impressively varied range of task capabilities includes high lifting. They're great general helpers for light duties in warehouses, supermarkets and production areas. Compact, quick, and easy to transport between jobs, they're designed to save space, time and money.

Model choice:

MODEL	CAPACITY (tonnes)	LOAD CENTRE (mm)	MAX SPEED (km/h)	VOLTS/ Ah
NSP12Q2LD	1.2	600	4.5	24/60
NSP12Q2LDI	1.2	600	4.5	24/60
NSP13Q2LD	1.3	600	4.5	24/100
NSP13Q2LDI	1.3	600	4.5	24/100

Features include:

- Light weight – making the 1.2 tonne models ideal for use on mezzanines.
- Clear-view masts – giving excellent forward vision (available with maximum lifts up to 3.6 metres).
- Choice between single and duplex masts – allowing economical matching with lift height requirements.
- Full free lifting mast on 1.3 tonne models – providing large free lift for use when height space is limited.

- Initial lift (I) models – raising mast and forks to give increased ground clearance, for better performance on ramps, dock levellers and uneven floors.
- Double pallet handling design of initial lift (I) models – enabling lifting and carrying of two loads simultaneously, with one on the support legs and one on the forks.

One of our most unusual EQ Line products is the mini order picker. It functions both as an order picker and as a safe rising work platform or ladder. Once you've tried it, you'll wonder how you ever managed without one.

DOWNLOAD
SPEC SHEET

MN0038Q2

MINI ORDER PICKER

24V, 380 kg

More than an order picker

A safer way to climb – and a quicker way to pick

Applications include:

- Order picking at levels 1, 2 and 3
- Reaching items as high as 5 metres
- Lifting operator platform to 3.3 metres
- Total loads (tray + platform + battery panel) up to 385 kg
- Serving as a ladder for inspection and maintenance tasks

Our EQ Line mini order picker does the job of a ladder too – but much more safely and efficiently. As well as light and medium order picking duties, you can use it for inspection and maintenance tasks at heights. Like changing a light bulb or repairing a ceiling fixture. This highly compact and manoeuvrable machine has many potential uses in warehouses, shops and other retail settings.

Model choice:

MODEL	CAPACITY (tonnes)	LOAD CENTRE (mm)	MAX SPEED (km/h)	VOLTS/ Ah
MN0038Q2	0.38	Not applicable	5.5	24/100

Features include:

- PIN code access and keyless start, supported by RFID tags – preventing unauthorised use and saving time.
- Small footprint – combining with easy steering for tight turns and flexible mobility in narrow aisles.
- Left and right multifunctional handles – enabling simultaneous control of acceleration, lifting/lowering and steering.
- High lifting ability – allowing platform to be raised up to 3.3 metres and enabling operator to reach heights up to 5 metres.
- Side light – providing clear vision for picking or placing of goods, with no loss of productivity in darker areas.
- Electrically adjustable loading tray position – giving convenience and safe forward vision.
- Safety gates – preventing operator from falling from the truck.
- Automatic height-related travel speed reduction – setting safe limits to ensure stability.
- Blue floor light, amber warning light and reversing buzzer – alerting pedestrians and other truck operators to the order picker's presence.

The EQ Line's sit-on tow trucks are great for transporting heavy loads on trailers, both indoors or outdoors. With comfortable seating, effective vibration damping and low-effort steering, drivers stay productive however long the distance or shift.

DOWNLOAD
SPEC SHEET

NTS30-60Q2

SIT-ON TOW TRUCKS

51.2V, 3.0 – 6.0 tonnes

Tough load luggers

Long distances, heavy loads, rough conditions – no problem

Applications include:

- Transporting goods and materials/components
- Short, medium and long distances
- Loads up to 6.0 tonnes
- Indoor and outdoor work
- Use on rough surfaces and gradients

These small but strong EQ Line tow trucks are perfect for airports, stations, warehouses, workshops and factories. They will transport heavy trailer loads rapidly and safely across sites. They're ruggedly built too, to handle outdoor and indoor conditions, rough surfaces and the knocks and bumps of a busy workplace. Meanwhile, for their drivers, they offer day-long comfort – mile after mile.

Model choice:

MODEL	CAPACITY (tonnes)	LOAD CENTRE (mm)	MAX SPEED (km/h)	VOLTS/ Ah
NTS30Q2	3.0	Not applicable	14.0	51.2/206
NTS60Q2	6.0	Not applicable	14.0	51.2/277

Features include:

- Display with fault warnings – enabling timely attention to prevent damage.
- PIN code access (optional) – preventing unauthorised use.
- BDI (battery discharge indicator) – supporting optimal timing of battery charging and changing.
- Comfortable seat and spacious operator area – minimising driver tiredness and fatigue in applications involving long distances and shifts.
- Rubber shock absorption on both axles – providing effective vibration damping, for extra luxury
- Armrest option – adding further comfort.
- Low-effort steering wheel – avoiding strain.
- Compact design – enabling easy manoeuvrability in narrow and congested areas.
- Coasting button – allowing fine adjustment of truck movements, for precise control and less risk of collisions.
- Coupler with three height settings – ensuring reliable connection to a variety of trailers.
- Trailer power access unit – providing connection to electricity supply.
- Lighting kit – including front and rear work lights, a flashing amber light and blue floor spot, for see-and-be-seen safety.
- Warning light option – additionally alerting pedestrians and other truck operators to the truck's presence.
- Rear mirrors – aiding all-round view.

A wealth of dealer services

Wherever you are, and however hard your challenges, your local Cat lift truck dealership is there to help. Our dealers' customer support and service teams are dedicated to answering every need. They will work closely in partnership with you and your business to ensure:

- You have the right trucks and equipment for the job
- Your trucks keep on running – at optimum efficiency
- Your operation achieves maximum results

Aftersales service

Our fully equipped service vans will respond quickly to your calls. They carry specialised tools and stocks of genuine parts. Their drivers are well-trained service technicians with the latest technical information and knowledge. You can be sure of highly professional inspection, servicing and repair work.

Maintenance programmes

Carefully scheduled servicing by our factory-trained technicians will minimise downtime and extend truck life. Our individually tailored programmes also help you with accurate budgeting and control over operating costs. We can work out a maintenance plan that's right for you.

Financing options

We offer a wide range of finance plans to suit your cashflow and other circumstances. They include outright purchase, leasing and rental agreements. We can spread the cost of your trucks over their working life in the most tax-efficient way.

Fleet management

We can monitor, control and reduce your materials handling costs. We can then re-engineer your fleet to meet your needs more cost-effectively. Our optional benefits for national or multinational operations include: service contracts; training and safety programmes; fleet audits; application surveys; centralised billing; cost analysis and reporting.

Parts supply

Parts availability is crucial to maintaining productivity. Our 'full line, first pick' rate is the best in the industry. It currently stands at 97%. For current models it's even higher.

Dependable support

You can depend on our dealerships. They, in turn, can depend on the support, expertise and resources of our global organisation. Together we'll do whatever it takes to make your business stronger.

For more information about Cat EQ Line trucks, or the rest of our comprehensive range, please contact your Cat lift truck dealer or visit **www.catliftruck.com**.

Whatever materials handling equipment you need, our global network of Cat lift truck dealers is equipped to provide the solution.

Our constant investment in selecting, developing and supporting our dealer network ensures you receive not just the best equipment but the best service, advice and support in the industry.
