STYLISH AND POWERFUL

POWER PALLET TRUCKS
1.6 - 2.5 tonnes
ADD VERSATILITY TO YOUR WAREHOUSE

If smooth and efficient horizontal transport is an important element of your warehouse handling operations, this range of Cat® power pallet trucks is for you.

Built around powerful, programmable AC motors, these trucks offer a range of models and options to suit almost any horizontal handling situation, from short shuttles to long distances.

MAJOR BENEFITS FOR YOUR OPERATION

The ‘pedestrian’ and ‘platform’ trucks are controlled by cleverly designed tiller arms, with precise and intuitive controls that link the operator almost seamlessly to the truck and pallet load. The stand-on/sit-on models incorporate, within the ergonomic operator compartment, control consoles for accurate handling that are also comfortable and easy to use.

These systems give the trucks a smooth, controllable feel which enhances the safety of the operator and of other staff in the vicinity, while also helping to prevent accidental damage to the forks, loads and racking.

The Cat range of power pallet trucks includes pedestrian, platform, stand-on and sit-on models, making them some of the most versatile available.

STYLISH AND POWERFUL

A range of trucks with smooth compact contours that encase AC power and versatility

AC drive motors give excellent traction and ramp performance, even when laden. They’re virtually maintenance-free and have a relatively low energy consumption compared to traditional DC motors.

The trucks can be set up to match application requirements using the programmable electronic controller, while built-in diagnostics monitor functions to maximise uptime.

Regenerative braking helps to extend shift life, by recycling energy, reducing brake wear and reducing maintenance.

The chassis designs aid stability within their compact footprints, for easy maneuverability in tight spaces and over short or long distances.

For added safety on the tiller arm models, braking is engaged in a number of situations: when the tiller is released; when the tiller is fully raised or lowered; when changing travel direction; when releasing the accelerator; when stopping on a ramp.

Externally, the smooth contours are not only stylish but functional and hard wearing, allowing easy access to all components and minimising essential maintenance time.

With cold storage modifications available on most trucks, this Cat power pallet range is capable of meeting the challenges of a wide range of day-to-day loading bay and shuttle applications.
The NPF25N2, designed for heavy duty handling, features an ergonomically positioned steering wheel to increase driver comfort.

The NPP16-20N2 models are ideal for loading and unloading.

The NPP16PD pedestrian double pallet handler boosts productivity by carrying two pallets simultaneously.

The NPV20N2 platform truck for transport over medium/long distances.

The NPR20N stand-on truck offering a short turning circle and optimal protection of driver.

The NPS20N sit-on truck for long distances offering optimal ergonomics for driver.

(Pictured far left, from top) The NPP16-20N2 models are ideal for confined working areas.
PEDESTRIAN POWER

IDEAL FOR EFFICIENT LOADING, UNLOADING AND SHUTTLE APPLICATIONS.

Taking most of the legwork out of pedestrian pallet handling, the NPP range is ideal for both horizontal movements and vehicle loading/unloading, with industry-leading performance that inspires confidence and boosts productivity in any application.

Operators will love the effortless comfort of the latest models’ updated tiller arm along with the speedy acceleration and precise drive control. Fleet managers will appreciate the robust, water-resistant construction and low operating costs. Maintenance staff will adore the fast and easy access to critical components and the option to charge the truck without removing the battery.

And health and safety supervisors will be delighted by the extra stability of the linked suspension castor wheels and the option to slow the truck down for extra-smooth handling.

The NPP16N2 is an ideal all-round machine for light handling applications and is small enough to be used on a mezzanine floor or transported in the back of a goods vehicle. The NPP18N2 and NPP20N2 add greater capacity for heavier loads and more intensive work.

The NPP20N2R is equipped with a foldable platform for occasional use when driving over longer distances. The spacious platform of the NPP20N2R, with suspension for a comfortable ride, is easy to get on and off and also offers good ground clearance.

The NPP20N2E is equipped with lifting forks (735 mm height) that offer an ergonomic position for loading and unloading items with minimal physical strain.

The double pallet handler, NPP16PD, can carry two pallets simultaneously (one above the other) for higher productivity with no need for wider passage space. Its offset tiller arm allows the operator to walk alongside and improves visibility.

The NPP16-20N2(R)(E) / NPP16PD
OPTIONS INCLUDE*

- Pallet entry/exit rollers
- Load backrest
- Multifunctional display including hour meter
- Cold store modification class III for environments down to -35°C
- Equipment holder for: A4-size list bracket, computer rack, bottle holder and pen holder (except for NPP16N2 with 150Ah battery)
- Large lift/lower levers
- Single load wheels (standard on NPP16N2)
- Internal battery charger (except NPP20N2R)

* For a complete list of options, please contact your nearest dealer.

NPV20N2 / NPF25N2
PLATFORM POWER

DESIGNED FOR MEDIUM AND LONG-DISTANCE MOVEMENTS AS WELL AS VEHICLE LOADING/UNLOADING.

The NPV/NPF range of power pallet trucks have a fold-down/fixed operator platform that takes all of the hard work out of transporting loads.

Operators will enjoy the smooth and precise control characteristics, the comfortable platform area and the extremely low noise levels. Fleet managers will appreciate the water- and dirt-resistant construction, this range’s all-round robustness and reliability and the energy-saving programmable drive options. Maintenance engineers will love the easy access to all major truck parts and the reduced component count that results from the integrated drive and lift system. And health and safety managers will be impressed with the high ground clearance, the tapered fork tips and the excellent stability provided by the linked suspension castor wheels.

The NPV20N2 is a highly capable 2.0 tonne machine for medium and heavy-duty handling applications, yet still small enough and sufficiently manoeuvrable for work in the back of a goods vehicle. The more muscular NPF25N2 has a 2.5 tonne lift capacity and more powerful battery for heavier loads and even more intensive work. The state-of-the-art steering wheel gives intuitive, precise control whilst the high travel speed of 12 km/h shortens cycle times. The fixed platform and sides with integrated backrest offer increased driver protection and comfort.

OPTIONS INCLUDE

- Pallet entry/exit rollers
- Load backrest
- PIN code access (standard on NPF25N2)
- Cold store modification class III for environments down to -35°C
- Lateral battery exchange system (NPV20N2)
- Large lift/lower levers (NPV20N2)
- Electric steering (NPV20N2)
- Higher drive speed, 9/12 km/h loaded/unloaded (NPV20N2)
The **NPF25N2** features a fixed platform to offer more protection for the driver.

Narrower truck body makes loading/unloading in confined areas like goods vehicle trailers much easier (**NPV20N2**).
HALVE THE NUMBER OF MOVEMENTS REQUIRED.

The NPV20PD double pallet handler with foldable platform saves time by carrying two pallets simultaneously (one above the other). It is perfect for double stacking on the loading ramp and for transporting incoming or outgoing loads over short, medium or long distances.

A compact duplex mast optimises forward visibility and offers two lift heights: 1.6 and 2.0 metres. Each set of forks will carry 1.0 tonne, giving a total load capacity of 2.0 tonnes.

Further ergonomic and safety features include a five-point chassis, with a hydraulic friction force system, and anti-rollback functionality.

NPR20N
STAND-ON POWER

DESIGNED FOR HORIZONTAL TRANSPORT ACROSS THE LONGER DISTANCES IN YOUR WAREHOUSE.

Powerful, ergonomic and easy to service, the NPR20N features a console display that includes warning lights, drive direction indicator, load weight indicator, hour meter and battery charge indicator to keep the operator informed at all times.

The electric steering system, combined with narrow chassis width and fully programmable functions such as speed, acceleration and regenerative braking enables fast, efficient and safe handling whatever the application.

The ergonomically designed control console enhances stress-free and precise operation that aids productivity and safety.

[DOWNLOAD SPEC SHEET]
THE POWER PALLET RANGE HAS BEEN DESIGNED FOR EASY MAINTENANCE AND SERVICING.

All trucks benefit from easily opened panels and covers, as well as a swing-out seat on the NPS20N, for quick service access to all components.

Although the powerful AC drive motors are virtually maintenance-free, built-in diagnostics monitor truck performance to minimise essential servicing downtime.

Battery exchange is also quick and easy, using either standard battery rollers available on most models or the optional lateral exchange system on the NPV20N2 model.

Your dealer can advise you on the most efficient method to suit your operation. More information on maintenance programmes and other dealer services are outlined in the following pages.
A WEALTH OF DEALER SERVICES

Wherever you’re located, however tough the work you do, you’ll find a local Cat lift truck dealership and customer support service dedicated to answering your needs with integrity and dedication to customer satisfaction. Operating closely in partnership with your dealership will ensure your Cat equipment keeps running with optimum efficiency at all times – for outstanding results.

**Aftersales service**
Fully equipped service vans, carrying specialised tooling and carefully selected stocks of service items, are on call to ensure the best quality care for your fleet. Manned by well-trained and dedicated service technicians, using the latest technical information and genuine parts, they ensure inspections and service operations are carried out to the highest professional standards.

**Maintenance programmes**
Our individually tailored programmes ensure prompt, professional service while giving our clients accurate budgeting and full control over operating expenses.

And timely maintenance, carried out by factory-trained lift truck technicians can minimise downtime and extend equipment life. Your dealer will be happy to propose a maintenance plan that’s right for you.

**Financing options to suit your cashflow**
Your Cat lift truck dealer can offer a wide range of financing options including outright purchase, leasing and rental agreements, to spread equipment costs over its working life in the most tax-efficient way.

**Fleet management**
We can identify, control and reduce the cost of materials handling and re-engineer your fleet to improve utilisation.

For customers with national or multi-national operations, your Cat lift truck dealer can provide further benefits to your business, such as service contracts, training and safety programmes, fleet audits, application surveys and centralised billing, as well as cost analysis and reporting.

**Parts operation**
Our parts availability rate is one of the highest in the industry at 96% full-line, first-pick, and higher for current production models, from our centrally based facility located in Belgium.

**Depend on us**
Our whole organisation is geared to providing a seamless and efficient service to keep your operation running smoothly and profitably.
For more information about Cat Power Pallet trucks, or the rest of our comprehensive range, please contact your Cat lift truck dealer or visit www.catlifttruck.com.
Whatever materials handling equipment you need, our global network of Cat lift truck dealers is equipped to provide the solution.

Our constant investment in selecting, developing and supporting our dealer network ensures you receive not just the best equipment but the best service, advice and support in the industry.

LET'S DO THE WORK.
